

### Flow Detection

BinMaster's flow detection devices offer a solution to material cross-contamination problems by using Doppler technology to communicate flow or no flow status to the user. This two-piece flow detector features non-intrusive, flush-mounting designs and non-contact operation which eliminate flow stream interruption and reduce equipment wear.

Description	Part No.
<b>FLOW DETECT 2000</b>	
FD2000 - Microwave flow / no flow monitor in NEMA 4X enclosure, 24 VDC, certified for Class II Groups E, F, & G	Standard: 730-0668 ATEX: 730-0668-EX
<b>FLOW DETECT ACCESSORIES</b>	
Optional saddle style pipe mount kit for Flow Detect 1000. Includes gasket.	416-0607
PSDC-4 - 24 VDC / 30 VA, NEMA 4X enclosure mounted power supply	730-0577
